-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Indicated Allowable Claims Withdrawn

1. Claims 5-6, 11-12, 18, 22-23, 28 and 31-32 indicated as being allowable in the last Office Action of June 27, 2005 has been withdrawn in view of the newly uncovered prior art as follows:

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 5-6, 11-12, 18, 22-23, 28 and 31-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-30 of U.S. Patent No. 6670345. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the Patent'345 are directed a label having a member with length greater than the periphery of the object, printed indicia thereon, and a tab. However, Patent'345 but fails to teach that the adhesive is at least partially deadened. It would have been obvious to

Art Unit: 1772

one having ordinary skill in the art that the label member of Patent'345 would have partially deadened adhesive as claimed in dependent claim 18.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 22, 36 and 40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is improperly dependent from cancelled claim 14.

Claim 36, as stated, is found to be vague because the phrase "a protective material to at least one portion" is deemed to be incomplete. It is unclear as to how are the protective member and the member not bearing adhesive are related.

Claim 40, the phrase "said parts" is found to be indefinite for lack of antecedent basis.

Allowable Subject Matter

6. Claims 33-35, 37-39 and 41-48 are allowed.

The prior art fails to teach or suggest that the planar member having a length greater than the periphery of the object and a first edge having a different length than a second edge such that the first length is oriented at an oblique angle relative to the second length of the member.
